

DIGITAL LIBRARY

Digital Library is the concept of information stored digitally and made accessible to users through digital systems and networks, but having no single location. It is, therefore, analogous to a library as a storehouse of information, but has a virtual existence in the digital spaces.

College Digital Library was established with the Support of Fourteen Computers, and it accommodates the Internet facility to the Students community as well as Faculty.

With the support of the Computers which facilitates the internet to the students can browse the **Open Educational Resources** which can be enriches to their **Daily Academic Activities** as well as for their **Career Development**.
