DEPARTMENT OF CHEMISTRY

A REPORT ON GROUP DISCUSSION (2019-2020)

As a part of departmental annual curricular plan, the department organizes group discussions on various topics in the college. The main motive is to observe their personality, skills and ability to discuss the given subject and to suggest and guide them on how to take part in group discussions.

Objectives:

- To improve their knowledge of the given content through discussion
- To give an opportunity to combat with fear factor i.e. stage fear
- To connect with the audience and understand the concept of voice modulation
- Plays a vital role in personality development along with effective communication skills with distinct pronunciation and articulation

TOPIC: HAZARD TOPIC: POLLUTION-A HEALTH

GROUP --A

S.NO	NAME OF THE STUDENT	GROUP
1	B.RAJITHA	M.P.C
2	CH.SWAPNA	M.PC
3	A.BHAGYA LAXMI	M.P.C

NAME OF THE STUDENT: B.Rajitha

GROUP : B.Sc (M.P.C) 1st Year

According to my opinion environmental pollution is done by the human being. Unnecessary use of more amounts of Fertilizers, insecticides pollutes both land and water. They doesn't think that is not good and who face problem for it.

GROUP --B

S.NO	NAME OF THE STUDENT	GROUP
1	S.RAMYASRI	B.Z.C
2	R. SAI SUMA	B.Z.C
3	D.MOUNIKA	B.Z.C

NAME OF THE STUDENT: S.Ramyasri

GROUP : B.Sc (B.ZC) 1st Year

Modern Development environmental pollution poses a great danger to the health of the people. It has given rise to numerous diseases. The present century poses a very serious danger of human survival on earth by nuclear threat. It has been proved that still Nagasaki and Hiroshima are totally unsuitable for human life.

GROUP --C

S.NO	NAME OF THE STUDENT	GROUP
1	T.SRAVANTHI	M.P.C
2	D.PRAVALIKA	B.Z.C
3	E.MAHESHWARY	B.Z.C

NAME OF THE STUDENT: T.Sravanthi

GROUP : B.Sc (M.P.C) 1st Year

Factories and industries keep throwing out smoke. These smokes contain toxic gases. They pollute the air. People breathing this impure air get diseases affecting the lungs and the respiratory system. This pollution, the ozone layer in the atmosphere is becoming thinner and thinner. As a result the solar radiation hits us directly and causes diseases like skin cancer.

GROUP --D

S.NO	NAME OF THE STUDENT	GROUP
1	B.SANDYA	B.Z.C
2	P.MANASA	B.Z.C
3	A.KRISHNAVENI	B.Z.C

NAME OF THE STUDENT: B.Sandya

GROUP: B.Sc (B.Z.C) 1st Year

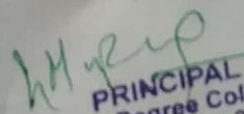

Acid rain is one of the threats of pollution. We burn coal, petrol and diesel in vehicles and power stations. The fumes given out contain oxides of nitrogen; carbon and sulphur. They react with water vapor and produce acids. The acid rain that falls to the earth damage houses and ancient buildings of historical value. The acidity in the water destroys fish and other aquatic life. The oxides of carbon and nitrogen trap the heat of the sun. As a result the atmospheric heat increases. This is called global warming.

Conclusion: Environment can be saved by planting more trees, recycling, reusing, reducing pollution, creating awareness through environmental programs etc.

If we want to save the environment then, we should stop the exploitation of natural resources.
