|-------|-----------------------|--|
|       | <b>B.Com. General</b> | At the end of the program, the students of B. Com ( <b>General</b> ) will:   |
|       |                       | 1. Be completely acquainted with all branches of accounting required for a B. Com degree and have a thorough understanding of basic papers in Finance.   |
|       |                       | 2. Have exposure to computerized accounting and current trends in Accounting & Finance.  |
|       |                       | 3. Have exposure to solving real time, practical problems/cases, which will form part of skill assessment relating to: (a) Cost Accountancy (b) Taxation (c) BRS (d) Rectification of errors (e) Final accounts of a partnership firm/ Company |
|       |                       | 4. Be able to critically evaluate and analyze financial statements.  |
|       |                       | 5. Have an overview of international accounting standards  |

|  | Course                  | Programme Specific Outcomes   |
|--|-------------------------|---|
|  | <b>B.Com. Computers</b> | At the end of the program, the students of B. Com (Computers) will:   |
|  |                         | 1. Acquire a thorough conceptual knowledge of subjects relating to Accounts, Finance, Banking, Insurance, Marketing, Law and Economics.   |
|  |                         | 2. Learn the concepts and mechanics of E commerce and be able to design a simple website.   |
|  |                         | 3. Gain a working knowledge of programming languages relevant to industry and databases.  |
|  |                         | 4. Be capable of working in groups and understanding interpersonal & team dynamics.   |
|  |                         | 5. Be equipped with latest trends in business automation, a basic knowledge of statistical tools required for business analytics & skill sets required for leadership & management. |

| SL No | Course                             | Programme Outcomes   |
|-------|------------------------------------|--|
|       | <b>B.Sc. (Bachelor of Science)</b> | 1. Students will have a broad foundation in the three major subjects of their choice with scientific reasoning, problem solving and analytical skills.                           |
|       |                                    | 2. The students are trained in a breadth and depth of experimental techniques using modern instrumentation which help them to take up higher education or jobs after the course. |
|       |                                    | 3. They develop the ability to effectively communicate scientific information in written and oral formats.   |
|       |                                    | 4. They acquire the ability to work in teams and apply basic ethical principles.   |

|                      |    | Programme Specific Outcomes  |
|----------------------|----|--|
| <b>B.Sc.<br/>MPC</b> | 1. | Capable of analyzing and solving problems using reasoning skills based on concepts of Physics.   |
|                      | 2. | Know and demonstrate understanding of the concepts from different branches of Mathematics  |
|                      | 3. | Develop the knowledge, skills and attitudes necessary to pursue further studies in Mathematics and research in Mathematics.  |
|                      | 4. | Understand the diverse applications of various fields of basic science and carry the knowledge and applications of basic sciences to community   |
|                      | 5. | Students will be able to understand the fundamental theories, concepts and applications in four basic areas of research in chemistry (Analytical, Inorganic, Physical & Organic). Develop the ability to explore new areas of research in Chemistry and allied field of Life sciences. |

|                       |    | Programme Specific Outcomes   |
|-----------------------|----|---|
| <b>B.Sc.<br/>MPCS</b> | 1. | Know and demonstrate understanding of the concepts from different branches of Mathematics   |
|                       | 2. | Develop the knowledge, skills and attitudes necessary to pursue further studies in Mathematics and research in Mathematics                  |
|                       | 3. | Understand core physical concepts, principles and theories along with their applications  |
|                       | 4. | Develop proficiency in the analysis of complex physical problems and the use of mathematical or other appropriate techniques to solve them. |
|                       | 5. | To provide comprehensive understanding of programming concepts and to understand software development as a part of Computer Science         |
|                       | 6. | Demonstrate proficiency in problem-solving techniques using the computer  |

|                      |    | Programme Specific Outcomes   |
|----------------------|----|---|
| <b>B.Sc.<br/>BZC</b> | 1. | Emphasizes the diversity in form and function of plants and animals, create an awareness of the impact of Chemistry on the environment, society, appraise role of green chemistry in environment sustainability.  |
|                      | 2. | Students will be able to pursue higher education & focuses on scientific research, and apply this knowledge in both real life and in a laboratory setting.  |
|                      | 3. | The fundamental skills within the field of Biology and Chemistry are understood and hence can function effectively as professionals in the Life Science based industries.   |
|                      | 4. | This programme is vital to further increase their understanding of human health and environmental issues.   |
|                      | 5. | Students will be able to understand the fundamental theories, concepts and applications in four basic areas of research in Chemistry (Analytical, Inorganic, Physical & Organic). Develop the ability to explore new areas of research in Chemistry and allied field of Life sciences |
