2.6.2: Attainment of programme outcomes and course outcomes are evaluated by the institution

Response:

The process of measuring the attainment of the CO's(course outcomes),PO's(Program outcomes) and PSO's(Program specific outcomes) is different from one other. The assessments tools general used to measure the attainment of Cos are two types. They are direct method and indirect method.

1.Direct Method: In this method the attainment of CO's(course outcomes) is measured by observing the performance of the students in continuous internal evaluations(CIE) and semester end-examinations. In this method the performance is shown as a grade based on the total marks obtained by the student both IE(internal exam-20Marks) and semester exams (80Marks).

2.Indirect Method: In this method the attainment is measured by collecting data of students exist survey,alumni survey etc whereas the attainment of pos and PSOs can be measured by observing the performance of the students in various competitions such as elocution, debate, seminars and preperation of assignments ,student study projects and performance in the programs such as TSKC(Telangana Skill Knowledge Center) and TASK(Telangana Academy for Skill and Knowledge).
