

## About Computer Science / Computer Applications Dept

### History:

Depart of Computer Science / Computer Applications was established in 1998, several eminent faculty worked at the department.

Three years (3 years) Undergraduate programme in computer sciences/ Applications is essentially aimed at developing a student with excellent programming and system related competencies. The student is supposed to be developing skills and knowledge in software technologies related to computer science. Teaching is focused in programming Languages as well as application programming.

### Vision

The Computer Science is about the use of computational techniques and thinking for solving problems, it stands to reason that computer science in turn can and must be applied to address the many critical problems of the 21st century, of which we may mention the need for smart machines and complex systems that can work with humans seamlessly and improve society as a whole, and sustainable development and usage of systems to make effective use of scarce and expensive resources such as energy. The laboratories built are equipped with all necessary logistics that are convenient for the students.

### Mission

#### Program Educational Objectives (PEOs)

**PEO-I Preparation:** To prepare students to succeed in employment/profession and/or to pursue graduate and research educations in Computer Science/Computer applications discipline.

**PEO-II Core Competence:** To provide students with a solid foundation, scientific and research fundamentals required to formulate, analyze and solve problems requiring knowledge of Computer Science and Applications

**PEO-III Breadth:** To prepare students with scientific breadth to innovate, design, and develop software products and to contribute in providing solutions related to multidisciplinary real life problems.

**PEO-IV Professionalism:** To inculcate in students professional and ethical attitude, effective communication skills and team work to become a successful professional.

**PEO-V Learning Environment:** To provide students with an academic environment that makes them aware of excellence and lifelong learning in computer technologies.
