Details of conducting workshop on *SCIENCE INFO*

A one day workshop was organised by the Govt. Degree college on 15.09.2017. The workshop was conducted for all the Government and Private Degree College students studying in and around the town of Narsampet. About more than 120 students participated in the Workshop.

Lt.Dr.B.Chandramouli, Principal of the college was the chief guest on the occasion and said Science is both a body of knowledge and a process. In school, science may sometimes seem like a collection of isolated and static facts listed in a textbook, but that's only a small part of the story. Just as importantly, science is also a process of discovery that allows us to link isolated facts into coherent and comprehensive understandings of the natural world.

Science is exciting. Science is a way of discovering what's in the universe and how those things work today, how they worked in the past, and how they are likely to work in the future. Scientists are motivated by the thrill of seeing or figuring out something that no one has before. Science is useful. The knowledge generated by science is powerful and reliable. It can be used to develop new technologies, treat diseases, and deal with many other sorts of problems.

G.Venkateswarlu, vice Principal of the college, Dr.E.Satyanarayana, IQAC Coordinator, teaching staff members of the college G.Gajanan, B.Swretha, M.Radhika, G.Srinivas, M.Naveen, T.BheemRao, J.Umarani, D.Parvathi, V.Devender, B.Ramesh, V.Poornachandar as well as the non teaching staff members were present in the workshop.
